

Exercise 2.7.

Alyssa's program is incomplete because she has not specified the implementation of the interval abstraction. Here is a definition of the interval constructor:

```
(define (make-interval a b) (cons a b))
```

Define selectors `upper-bound` and `lower-bound` to complete the implementation.

Answer.

```
(define (lower-bound i)
  (car i))
```

```
(define (upper-bound i)
  (cdr i))
```
